

## City of Grove Splashpad: A Destination For Kids From Far and Wide

The City of Grove pool was built in the 1960's and until recent renovations the pool was completely outdated. After visiting with Power Play, the City decided that a Splashpad offered a much needed recreational activity for the community.

A lake community, designated as the 'Pelican Capital', The City of Grove desired a Splashpad with a nautical theme. In 2009, they opened their unique water playground that includes a Pelican, Palm Tree, Bull Frog, Whale Tail, Tipping Buckets, Water Cannons and numerous Ground Sprays. In its second summer of operation, the Splashpad has proven to be a great success! Children from neighboring communities and even neighboring states make the trip to Grove to enjoy the Splashpad. Daycares, schools and summer camps make the Splashpad a destination all summer long. With no standing water, children play for hours while adults and parents enjoy the shaded areas around the Splashpad.

*"The Splashpad is one of our best investments and recreational activities enjoyed by our community. We are very pleased with the Vortex equipment, and the customer service provided by Power Play was above and beyond the city's expectations."*

Debbie Bottoroff, Assistant City Manager  
City of Grove, Oklahoma
